

REACH24H Kuala Lumpur Seminar 2015

Understanding Fast Developing Worldwide Regulatory Environment

March 24th 2015
Kuala Lumpur, Malaysia

Co-organized by CICM

CICM Chemical Industries
Council of Malaysia

OVERVIEW

In the recent years, growth and development of the global chemical industry has been staggering. The rate of innovation as well as discovery in the world of chemical industry has exceeded the predictions and expectations of many experts. In order to avoid unwanted casualties concerning safety, health, and environment, governing legislators are obligated to update and improve regulations in regards to chemical products manufacture and trade to ensure a greener and safer environment. A grasp of information to these updates would be crucial to ensure chemical companies in Malaysia to be well-prepared at an encounter of the chemical regulatory walls. On the 24th of March 2015, REACH24H proudly presents a one day seminar dedicated to deliver the latest global regulatory progresses, insightful expert opinions and cutting-edge solutions to these rising barriers. The one day event would cover everything from the recently published new chemical registration procedures in South Korea and Taiwan, to GHS implementation in major countries in Asia and Europe.

EVENT TOPICS

I. Introduction of Korean REACH

The Act on Registration and Evaluation of Chemicals of Korea (K-REACH) was published on the 22nd of May 2013 and has just been recently implemented as of 1st of January 2015. It is regarded as the first REACH-style chemical regulation adopted in an Asian country. K-REACH manages new chemical substances, existing chemical substances and downstream products by prescribing the requirements for registration, hazard evaluation and risk assessment. Topic to be discussed in this section would include the introduction of the legislation background, the obligations, comparison of the regulation with EU-REACH, and case studies on how the regulation would impact various industries.

II. Management on New & Existing Chemical Substance Registration under Taiwan TCSCA/OSHA

Taiwan Toxic Chemical Substances Control Act (TCSCA) was first issued in November 1986. The latest amendment of TCSCA was published on December 11, 2013 by the Environmental Protection Administration (EPA) and had come into force as of December 11, 2014. It is of great significance that the idea of the new and existing chemical substances management substances was brought into the revised TCSCA. In addition, Taiwan has made good progress establishing its chemical substance inventory and taking a stepwise approach towards effectively implementing a risk-based chemicals management system. Topics that would be covered in this section would include a brief introduction of the legislation, procedures towards compliance, its comparison with EU-REACH, and case studies on how the regulation would impact various industries.

III. GHS implementation in main Asia Pacific countries

The final "Globally Harmonized System (GHS) for classification and labelling" standard was created at the 1992 Rio Conference on Environment and Development. The GHS was designed to replace all the diverse classification systems and present one universal standard which all countries should follow (however, the GHS is not compulsory under UN law). Over the years countries all over the world had update their own classification and labelling standard to match and follow the GHS to improve safe and health in work environment. This includes major countries in the Asia Pacific region. In this section, the implementation of GHS and different rules of SDS and Labelling in various countries in Asia i.e. Singapore, Malaysia, Japan, Philippines, Thailand and etc. would be discussed.

IV. Brief Introduction on Significant Regulations in Southeast Asia Countries

As one of the most critical trading region in the world, the implementation of various regulations encompassing the world of chemical substance production and trade in the region is indeed a smart and crucial move by the governing officials in each country of the region. An understanding of the diverse regulations in the area would be beneficial for chemical companies to enhance their market opportunity in Southeast Asia. Three of the most recent updated regulation would be discussed in this section, i.e. "The Law Environmental Protection of People's Republic of Vietnam", "Hazardous Substance Control Act (Thailand)" and new chemical substance notification regulation details would be covered in this section.

V. Details of China GHS Implementation and Hazardous Chemicals Registration

China's adoption of UN GHS (global harmonized system) can be traced back all the way to the early 90s. Over the years, the GHS system in China has grown significantly encompassing a number of Orders, Measures and Standards released by different government sectors. On the other hand, Order 53 is the latest regulation released by State Administration of Work Safety (SAWS) to enhance control on hazardous chemicals in China. It is a key regulation in China that takes special concern on hazardous chemical's production, import/export, use, storage, transport and waste disposal. Topics to be discussed in this section would include the introduction of regulatory framework of hazardous chemical administration and GHS regulation updates in China.

VI. Compliance Strategies on China New Chemical Substances Notification

China New Chemical Substance Notification (China REACH) was released by the Ministry of Environmental Protection (MEP), aimed to supervise the production, import/export, use, storage, transport and environmental impact of all new chemicals in China. The regulation came into force in 2010 and had been revised several times to fulfill the needs for a better control over new chemical substances in China. In this section, topics including regulation background, notification procedure, post obligations case study, and etc. would be covered.

EXPECTED AUDIENCE

The following groups of attendees are to be expected in the seminar. Attendance of the seminar is guaranteed with a boost on their understanding and knowledge on the updated versions of chemical regulations worldwide which in turn will help them enhance the global market opportunities of their respective company.

1. EHS

professionals directly involved in practice of regulatory compliance in China, EU, Korea, Taiwan, and etc.

2. Decision-makers

for their companies' regulatory strategy in China, EU, Korea, Taiwan, and etc.

3. Companies' specialist

responsible to ensure regulatory compliance on whole supply chain

4. Business developer

who seek chemical market business opportunities in China, EU, Korea, Taiwan, and etc.

SPEAKERS

Ms. Joyce Chen

Ms. Joyce Chen has been a part of REACH24H Consulting Group ever since completing her degree in bio-system engineering from one of the most prestigious university in China, Zhejiang University. She is now a core member of the technical team focusing on the chemical regulations in the Asia Pacific region, in particular China's new chemical substance notification, Taiwan TCSCA and Taiwan new and existing chemical registration. In the past two years, she has successfully managed more than 50 compliance projects covering all notification types in China new chemical substance notification.

Mr. Jerrson Wei

Mr. Jerrson Wei is a senior consultant in REACH24H Consulting Group for various chemical regulatory affairs worldwide i.e. EU REACH, China new chemical substance notification, K-REACH and etc. Thanks to the project management experience in the past two and half years, Mr. Wei has gathered extensive experience in EU, China and Korea regulatory compliance practices and is professional in helping international companies in solving chemical regulatory problems they have.

Ms. Bella Zheng

Ms. Bella Zheng obtained her MSc in Chemistry degree from Braunschweig University of Technology, one of the leading science and technology university in Germany. She was a part and one of the most influential members of GCCCD (Society of Chinese chemists and chemical engineers in Germany). Ms. Zheng is a professionally trained speaker, and has been invited to deliver speeches in various events hosted by various chemical organizations. Her background and years of experience in the chemical industry had made her an expert in various areas of chemistry, including chemical regulations worldwide in particular GHS regulatory compliance in China.

SPEAKERS

Mr. Anderson Sukir

Mr. Anderson Sukir, is a business development manager and also a consultant in REACH24H Consulting Group. His background in the field of chemistry has made his understanding of the chemical regulation worldwide (China REACH, EU REACH, K-REACH, Taiwan TCSCA and GHS regulations from various countries) at a level similar to an expert. His professionalism in the field of business developing has made him the man responsible for the 2015 Asia Pacific Chemical Regulations Seminar in Kuala Lumpur.

Ms. Alison Liu

Ms. Alison Liu is the Manager regulatory affairs department in REACH24H Consulting Group. Since her early days in the company, Ms. Liu has been dedicating and focusing her work in the field of global chemical regulations and diverse consultancy techniques to fulfill the needs of various industries that ranges from product manufacturer, trader, all the way to logistic companies. Her knowledge and experience is without doubt one of the reason REACH24H is capable to provide a second to none regulatory compliance services.

EVENT REGISTRATION AND FEE

Registration Fee will include

- 1) One attendance ticket to the seminar
- 2) 1 lunch break and 2 coffee breaks
- 3) Free consultation to our company's chemical regulations expert
- 4) Newsletter and brochure subscription on regulatory news update post-seminar

CICM Members Early Bird **550RM**
(Closed on 1st of March):

CICM Members Standard Fee **700RM**
(Closed on 23rd of March):

Non-members Early Bird **700RM**
(Closed on 1st of March):

Non-members Standard Fee **850RM**
(Closed on 23rd of March):

EVENT VENUE

Time: 24th of March 2015 | 8:00-17:00

Venue: Renaissance Kuala Lumpur Hotel

Address: Corner of Jalan Sultan Ismail
and Jalan Ampang 50450 Kuala Lumpur
Malaysia

Hotel Telephone: 603.2162.2233

Registration Form

Please note: *Early bird fee would close by 28th of Feb 2015*
